EDUCATION

Rutgers University

B.S. Computer Science, Minor in Business Administration — GPA: 3.5

New Brunswick, NJ

Aug. 2024 – May 2028

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C++, R, ASM, CSS

AI/ML: LLM APIs (OpenAI, Anthropic Claude), prompt engineering, data modeling & evaluation pipelines

Frameworks/Technologies: ReactJS, Astro, Arduino, Raspberry Pi

Tools: VS Code, Git/GitHub, Arduino IDE

Certification: AWS Certified Cloud Practitioner

SELECTIVE PROGRAMS

DoD TRAIN AI Program • Columbia University Big Data & Machine Learning Summer Immersion • UPenn PACT Summer Program

EXPERIENCE

Rearc

Virtual

AI/ML Engineering Intern

July 2026 – Aug. 2026

- Built and iterated on an LLM-based resume grading evaluator for the HR department using the Claude Platform and Claude Code, reducing manual review time significantly.
- Designed data models and logged evaluation metrics across numerous test runs (logged through an Excel file) to track grading accuracy and consistency over time, identifying major improvement in output reliability.

Rearc

Hybrid / Virtual

Program Engineering Intern

June 2025 – Aug. 2025

- Designed a GUI application that ingests PDF files and uses the ChatGPT API to flag multiple types of potential bias in pdf documents, creating a usable detection sequence for users. This allows the user to see what types of bias are impacting their writing, either negativity or positively.

Rearc

Virtual

Program Engineering Intern

July 2023 – Aug. 2023

- Developed a Python program using the ChatGPT API to analyze 1,000+ customer records and extract names, addresses, emails, and product/service requests, reducing manual processing time by roughly 30%.

Mindbytes

Marlton, NJ / Virtual

STEM & Mathematics Instructor

July 2023 – Present

- Teach mathematics to several students across grades 2, 5, 6, and 7, adapting instruction to individual learning levels.
- Taught middle and high school students Python, Raspberry Pi, and Arduino programming, and circuit design fundamentals.

Schoolhouse.world

Virtual

Mathematics Tutor

July 2021 – Dec. 2022

- Created instructional presentations and tutored elementary and middle school students in fractions and pre-algebra.

PROJECTS

AI-Based Bias Detection | *Python, ChatGPT API*

- Built a standalone Python application using AI-assisted text analysis to detect and score potential bias in written documents, independent of the Rearc internship project.

XPiredWorkplace | *Python* | Rutgers Hackathon 2025

- Built a grocery expiration-tracking and organization application during a 24-hour Rutgers New Brunswick hackathon.

“CashOut” Mobile App | *JavaScript, JSX*

- Built a cash-settlement app for poker sessions that automatically calculates buy-ins and payouts and sends funds instantly via wire transfer or Venmo.

Living Portfolio | *TypeScript, JavaScript, Astro, CSS*

- Developed a responsive personal portfolio website using Astro, TypeScript, JavaScript, and CSS.
